- Load: 110 Brads
- Capacity (mm): 15 - 55

Cat. No. 006.50.860

Packing: 1 piece

SENCO **Fusion Technology**

The **Senco FN65DA (DA series) & Senco FN55AX (C1 series)** featuring Fusion Technology, has the power and utility of a pneumatic tool combined with the convenience of a cordless tool. The patented Reflex-Shot design provides an instant shot when the trigger is pulled with no ramp-up time. Perfect for anyone who does not want to deal with the hassle of a hose and compressor.

Sequential Actuation Trigger (also known as restrictive trigger or trigger fire) operates in the following sequence - depress the safety element at the nose of tool against the work surface then pull the trigger. After each fastener is driven, release the trigger and lift the tool off the work surface before starting the sequence again. This trigger is recommended and acceptable for most applications.

Contact Actuation Trigger (also known as dual action, bound or bottom fire) operates in the following sequence - pull the trigger first and keep the trigger pulled while moving the tool along the work surface with a bouncing motion, depressing the safety element at the nose of the tool against the work surface when the fasten is to be driven. This trigger is recommended for use by trained professionals only in high production or volume applications.

Always read the Operations Manual and Safety Instructions with all tools to ensure proper use and safety precautions.
